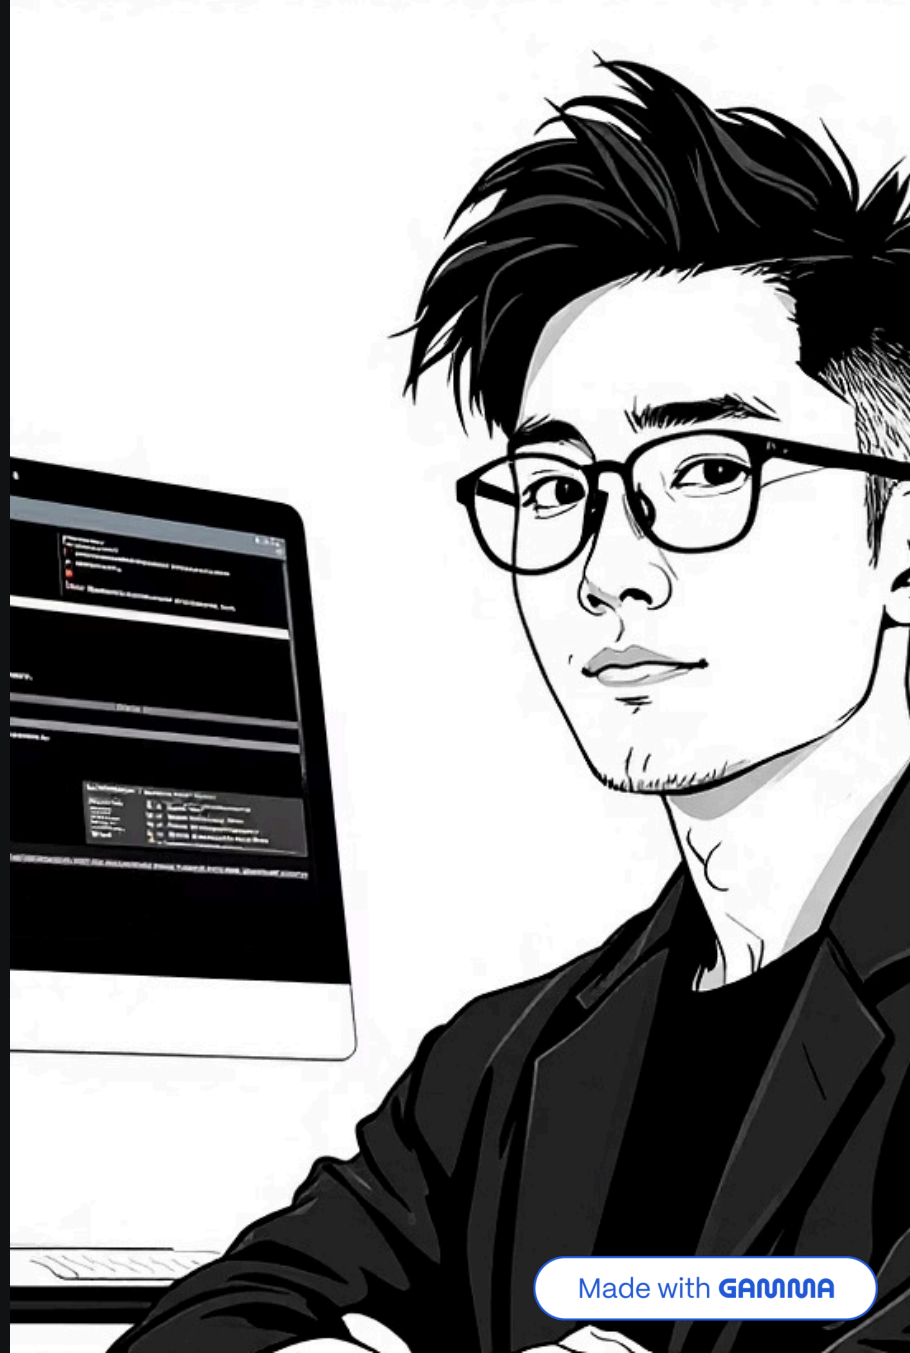
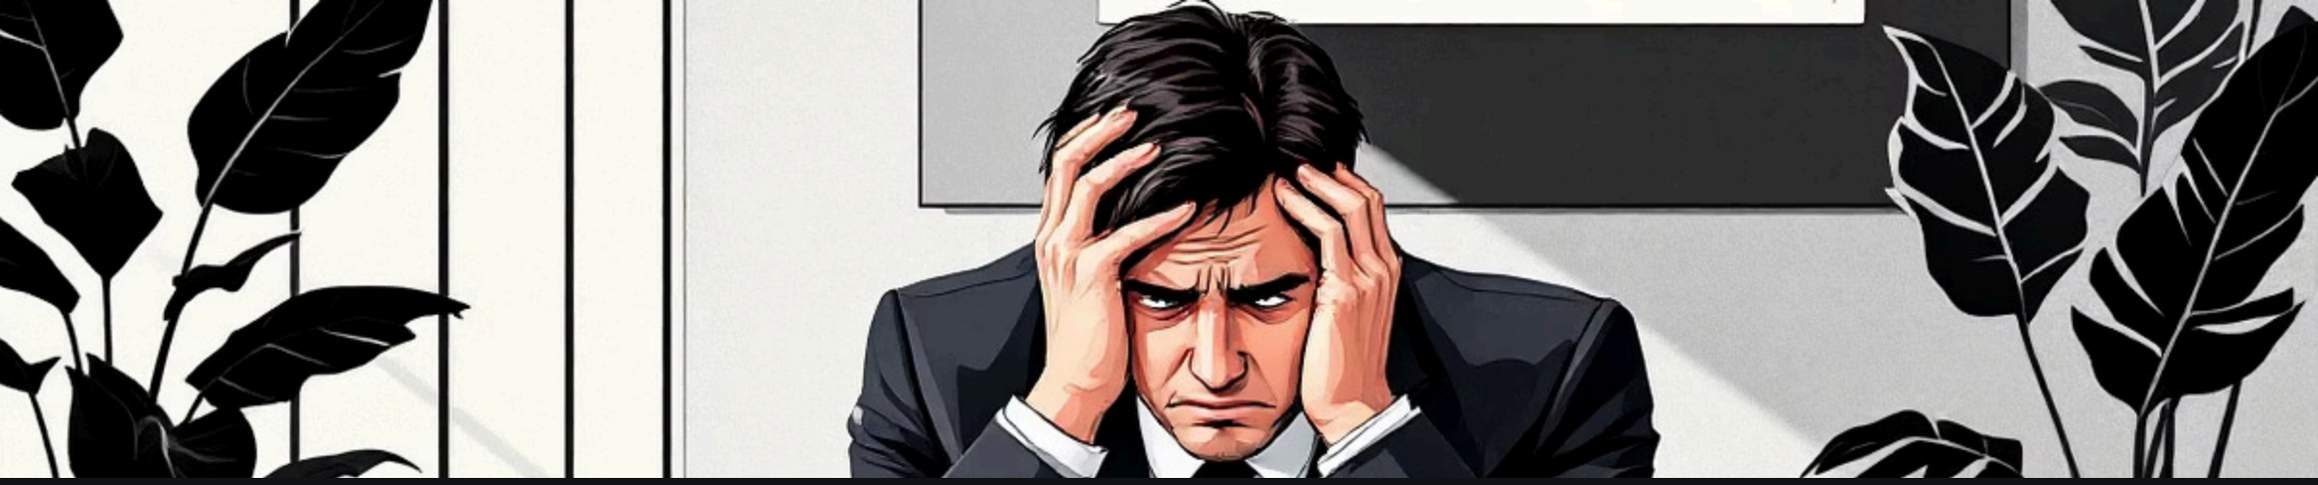
Fast, Secure and Global NIVIXPE

Revolutionizing cross-border payments with instant settlement and DeFi-powered security



Made with GAMMA



Problems

Fast, Secure and Global – NIVIXPE

Slow Transfers

Traditional cross-border payments take **1–5 days** to settle, delaying critical transactions.

High Fees

Transfer fees ranging from **3% to 7%** make sending money expensive.

Lack of Transparency

Complex processing chains and unclear fee structures confuse users and reduce trust.

Security Concerns

Risks of fraud and weak compliance measures threaten users' funds and data.

Limited Accessibility

Many regions have slow or unreliable payment infrastructure, limiting seamless global payments.

Use Cases & Our Core Advantages

NIVIXPE is designed to address critical payment needs across various segments, providing a superior experience with its innovative features.

Key Use Cases

- ### Global Remittances

  Migrant workers sending money home to families with **minimal fees** and **instant delivery**, ensuring funds arrive when needed.

- ### SME Cross-Border Trade

  Small and medium enterprises paying **international suppliers** or receiving payments from **global clients** swiftly and transparently, reducing operational delays.

- ### Freelancer Payments

  Independent professionals receiving **international payments** for services rendered, bypassing traditional bank hold times and high charges.

NIVIXPE's Edge

Unmatched Speed

Leverage DeFi for **real-time settlement**, making transfers instant, unlike slow traditional systems.

Cost Efficiency

Drastically reduced transaction fees, as low as **0.1%**, saving users significant amounts on every transfer.

Enhanced Security

Blockchain-powered transactions with **KYC/AML compliance** ensure top-tier security and fraud prevention.
